We are some of the businesses that will help create the future economy of the United States.

We want this economy to be energy efficient and low carbon. We believe there are cost-effective and innovative solutions that can help us achieve that objective. Failure to tackle climate change could put America's economic prosperity at risk. But the right action now would create jobs and boost competitiveness.

We encourage our government to:

1. Seek a strong and fair global climate deal in Paris that provides long-term direction and periodic strengthening to keep global temperature rise below 2°C
2. Support action to reduce U.S. emissions that achieves or exceeds national commitments and increases ambition in the future
3. Support investment in a low-carbon economy at home and abroad, giving industry clarity and boosting the confidence of investors

We pledge to continue efforts to ensure a just transition to a low-carbon, energy-efficient U.S. economy and look forward to enabling strong ambition in the U.S. and at the Paris climate change conference.
